CCTV without a VSIPro-HD

CCTV with a VSIPro-HD

The picture above shows without a doubt that the Bartender has entered "Cola" @ \$1.00 instead of a "Cocktail" @ \$6:00

STOP EMPLOYEE THEFT
with the VSIPro-HD

Employee theft in retail stores and restaurants accounts for more loss than shoplifting, burglary, and robbery combined!!

- Eliminate fraudulent transactions: Sweethearting, Refunds, Cancels, Voids, No Sales, Discounts – etc...
- Link the transaction information from the POS to HD-TVI, AHD, HD-CVI, 960H & IP Video CCTV systems
- Transaction information can be overlaid on the video in real-time
- Provides a simple way to determine if the correct amount is charged for an item in Live mode; Playback; On the phone app; On the CMS
- Suspicious transactions like VOID, NO SALE, REFUND, CANCEL Etc. can be flagged on-screen and/or linked to the event list on any commercial grade video recorder with an alarm input
- Works with all camera manufacturers
- Compatible with more than 400 cash register manufacturers
- Compatible with money counting equipment, ATM machines, scales & more
- Justifies the cost of the CCTV system and will quickly pay for itself in as little as 1-3 months in

most cases
The VSI was introduced in 1988. It originally worked with standard analog cameras. Since that time, it has been used in virtually every type of business that uses a cash register.
